

# THE WILDLANDS CONSERVANCY

## WIND WOLVES PRESERVE

### OUTDOOR DISCOVERY PROGRAMS

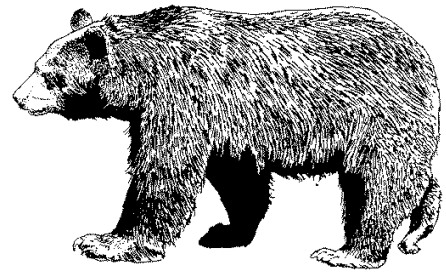

## ON THE WILD SIDE

## WEEKEND AND SUMMER PROGRAMS

Programs are between 2½-4 hours long

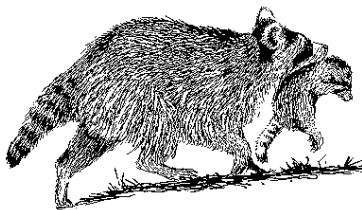

### **BASIC TRACKING SKILLS 3<sup>rd</sup>-7<sup>th</sup> grade**

Follow animal trails while learning how to distinguish between different animal tracks and signs. You will become aware of “hidden” information that will reveal an animal’s secret habits and possibly a hidden hideaway.

### **NATIVE ANIMALS 2<sup>nd</sup>-7<sup>th</sup> grade**

California has some amazing native wildlife. Explore their lives and survival strategies while tracking them, examining skulls, and meeting some live animal guests. Learn what makes each species unique and important.

### **BIRDS OF PREY 4<sup>TH</sup>-7<sup>TH</sup> grade**

Wind Wolves Preserve is home to many raptor species including eagles, falcons, owls and the California condor. We will spend time observing these winged wonders through spotting scopes and binoculars. Hands-on time with skulls, feathers, and pellets will help students get a close up look at adaptive characteristics. If time allows, we can also provide a slideshow presentation
